

JUNE 24 – 27 WARREN HILLS ROBOTICS CAMP

Learn to code and build this summer at Warren Hills!

Warren Hills Robotics Camp is back for a fourth year of fun. Created by WH High School students, the program teaches elementary age kids to code and apply logical thinking to fun problem solving tasks. Using LEGO Mindstorms, students will be taught how to build and program their robots to perform a variety of tasks. We hope that early exposure to Science, Technology, Engineering, and Math (STEM) will encourage students to pursue these fields in the future.

Register at:
