

No-Fee, Confidential, Trauma Counseling for Children and Adolescents Impacted by Domestic Abuse, Sexual Assault and/or Interpersonal Violence

Trauma-Focused Cognitive Behavioral Therapy (TF-CBT) is an evidence based therapeutic program for children and adolescents aged 3-18. TF-CBT provides children and their caregivers the opportunity to discuss and learn how to cope with the impact domestic abuse, sexual assault, and/or interpersonal violence has had on their lives. TF-CBT is typically completed within 12-16 weeks and includes individual sessions for both the caregivers and children, as well as joint sessions.

Outcomes of TF-CBT

- Increase healthy coping strategies
- Processing and neutralizing trauma in order to decrease trauma symptoms, including emotional difficulties and challenging behaviors

Topics Covered

- Age appropriate psychoeducation
- Relaxation and emotional regulation skills
- The connection between emotions, thoughts, and behaviors
- Personal safety planning
- Identifying future hopes and dreams
